

How to Remove Downloaded Installation Files from Downloader on Fire TV Devices

- Launch your Firestick
- Open **Downloader**
- Select **Files** from the left hand menu

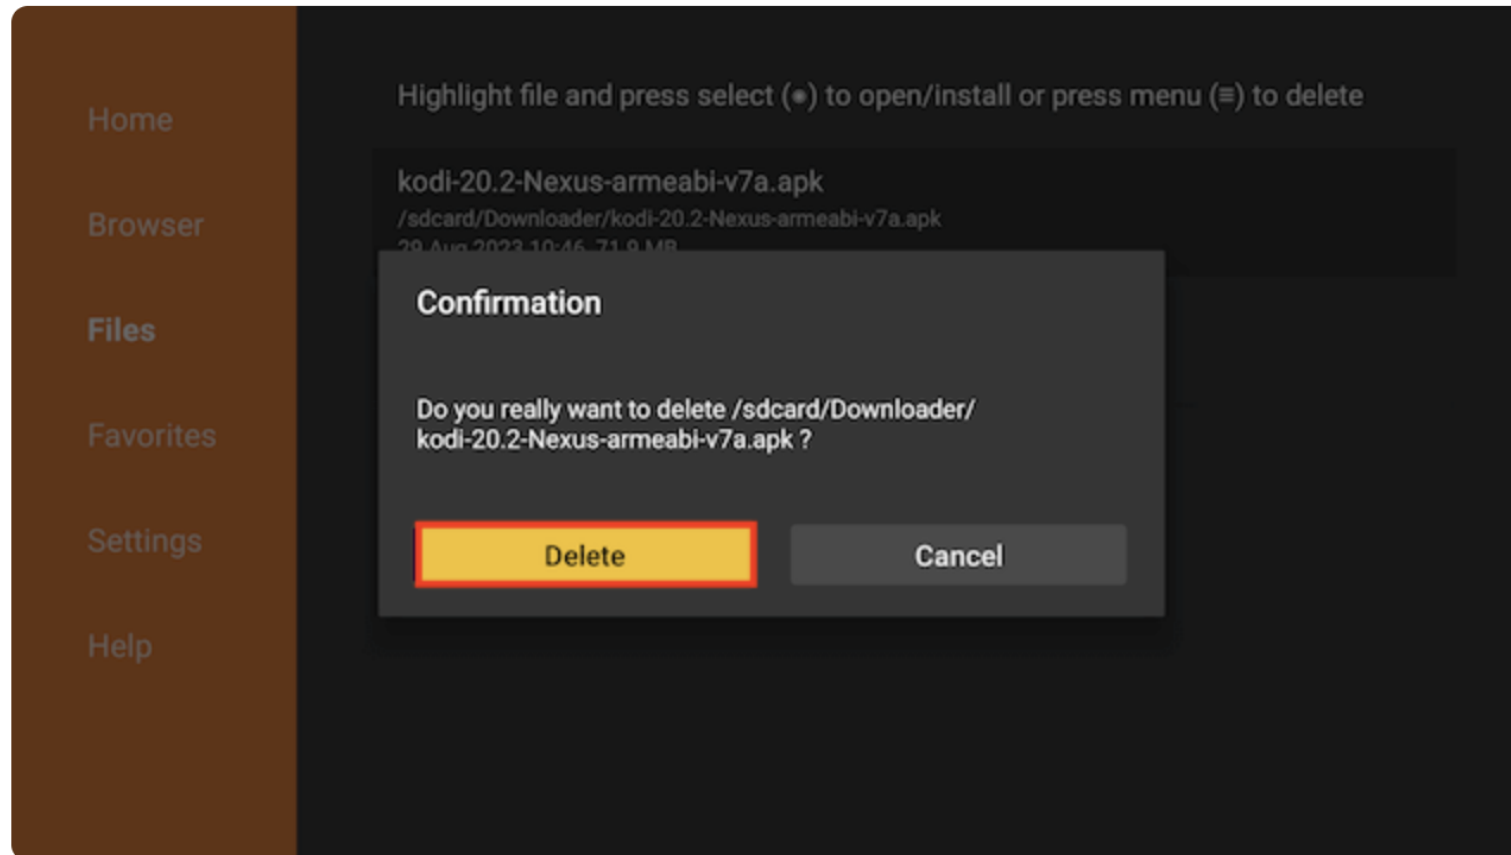

- Highlight a downloaded file. As you can see I have 2 files here and they are taking up 140MB of space so lets clean it up.

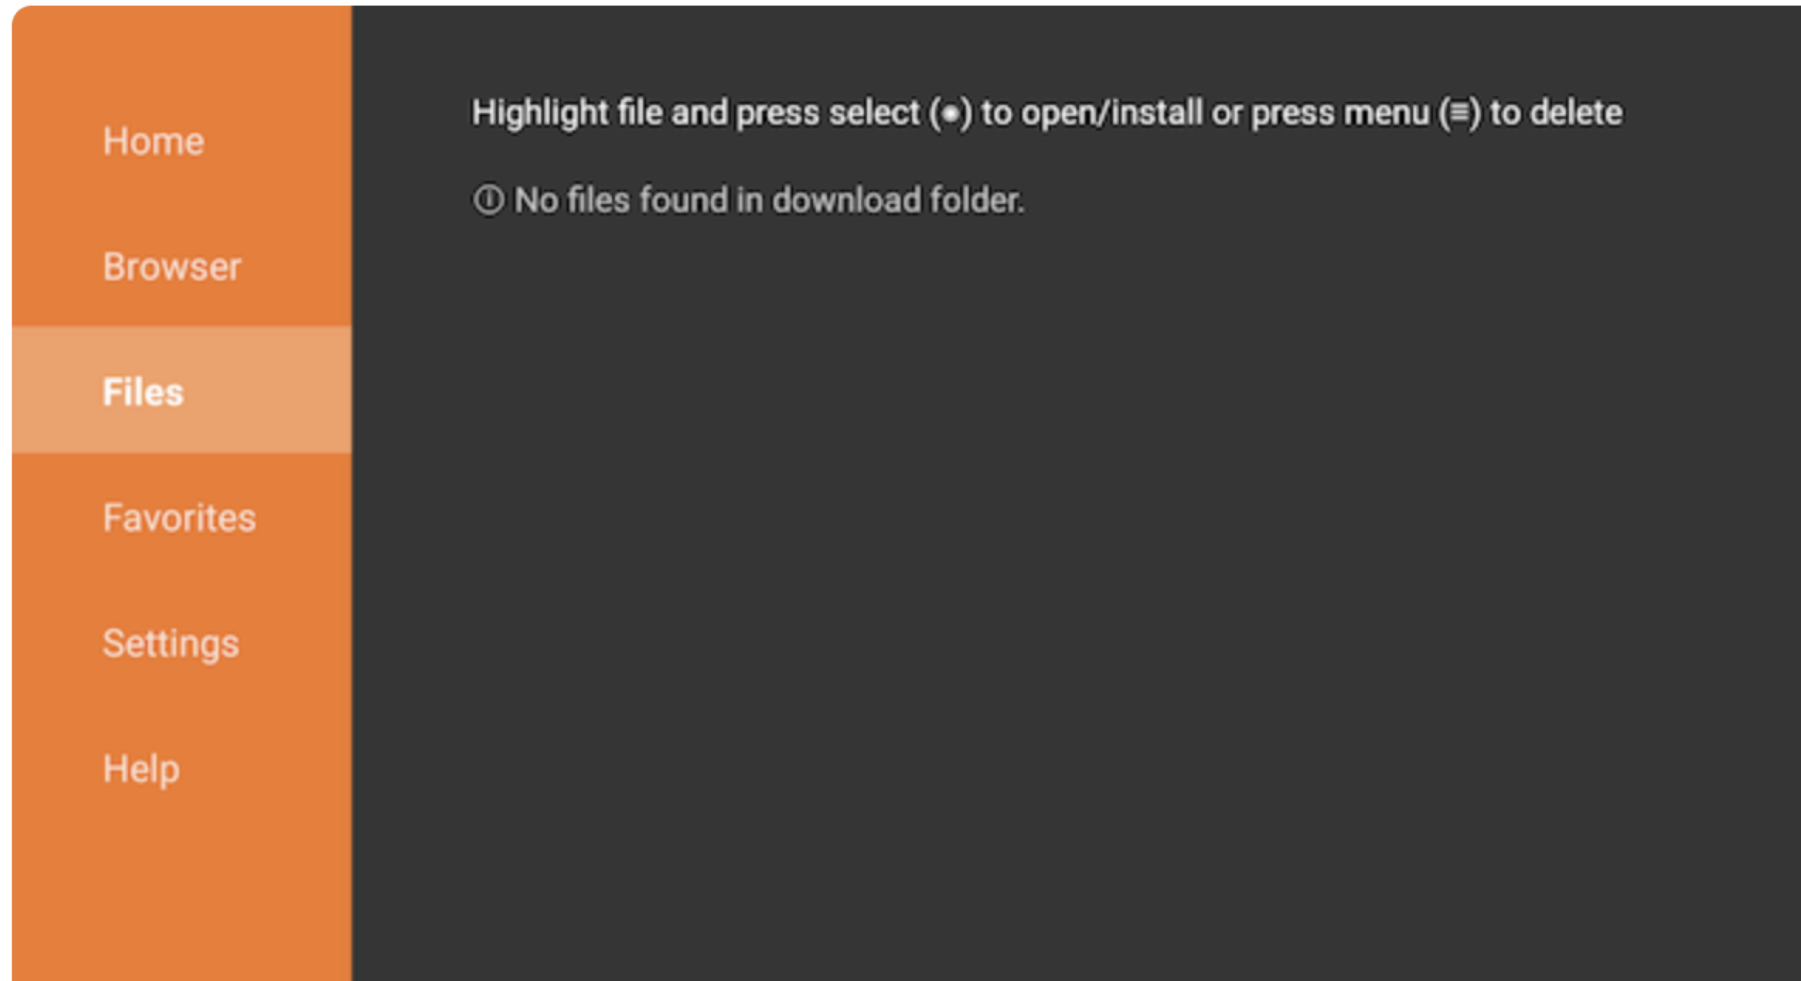

- You can now do one of two things to delete the file. Either long press on the middle button of your remote or press the 3 line button on your remote. Either will bring up the delete screen.
- Select **Delete**

- You can now do one of two things to delete the file. Either long press on the middle button of your remote or press the 3 line button on your remote. Either will bring up the delete screen.
- Select **Delete**

- You can now see that the file is gone
- Keep doing it until you've cleared everything

- You have cleared some Internal Storage and can proceed to install PBTv xc APP
